## Opening and safety sensor for automatic sliding doors

The IXIO-D is a combined technology sensor, opening and securing automatic sliding doors across the world since 2012. Artek inside offers a comfortable opening experience and the infrared curtains protect people from any contact with the doors. The IXIO-D secures the leading edge and door threshold during closing. Combined with the IXIO-S for safety during opening, it offers a complete solution for sliding doors, compliant with the EN 16005 and DIN 18650 safety standards.
